Sweeper Roller SKB

Robust sweeper roller for the most demanding tasks

The Sweeper Roller SKB with its densely packed bristles effectively sweeps away gravel, stones, mud, leaves and snow from hard surfaces and in track areas. The sweeper roller has a robust construction and works excellently even on hard packed snow.

 Do you have any questions? Contact us!

Durable
Can handle the most demanding tasks

Densely packed bristles
Efficient sweeping

More information

The Sweeper Roller is equipped with fork pockets to facilitate transport and splash guard to protect the tool from dirt.

The tool can be supplemented with a loose ballast drum to handle most tasks on the railway - get two machines in one (only applies to the dual drive version). Bearings and gears are included when purchasing a loose roller.

Features

- Splash guard made of robust polyethylene plastic
- Choose between single and dual drive
- The brush can rotate in both directions when sweeping
- Recommended for machines from 6 tons

Detailed Description

- Width: 1000-3000 mm
- Diameter bristles: 915 mm
- Height: 1200 mm
- Length: 1200 mm
- Motor: 250 ccm

Machine Requirements

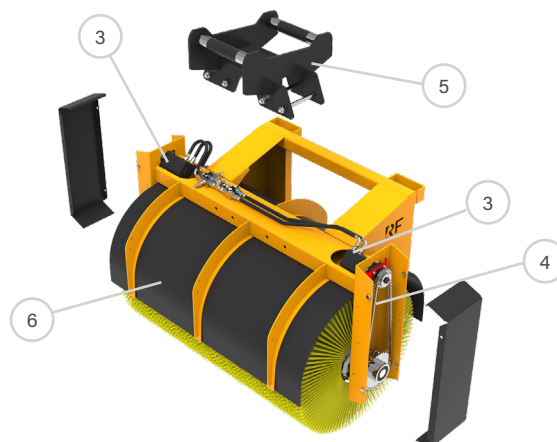

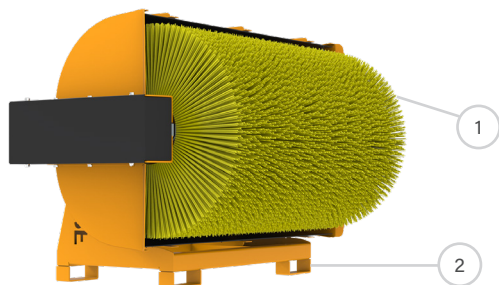

- One double acting hydraulic circuit
- Max pressure: 140 bar
- Oil flow: 55-80 l/min (14,5-21,1 GPM) (1 motor),
110-150 l/min (29,1-39,6 GPM) (2 motors)
- Rec. oil flow when sweeping snow: 70-80 l/min (18,5-21,1 GPM)

Accessories

Bolt-on Bracket AGS SKB, Fully automatic quick coupler systems from all manufacturers, Ballast roller, Sidewall, Splash guard

Product	Item number	Width (mm)	Bristl (mm)	Number of drives	Motor (ccm)	Pressure (bar)	Oil flow (l/min)	Weight (kg)
